

# Julian StarFest Event Schedule

## Woody's Mobile Observatory Friday 10 AM through Saturday Night

**LIVE FEED WITH WOODY SCHLOM** - The "Live Feed" astro-video tent theater displays live and nearly-live video from telescopes onto video monitors and a video projection screen. Because the cameras are much more sensitive than the human eye -- you will see the celestial objects in color and in much greater detail than through an eyepiece.

During the day, two side-by-side solar scopes, each with its own camera pointed at the same area of the sun, display different live detailed images because one scope "sees" the outer Chromosphere, while the other scope "sees" the next layer down, the Photosphere. You'll see delicate and bold prominences on the Sun's limb reaching several Earth-diameters out into black space, and filaments, plage, hot-spots and perhaps a sunspot or two on the Sun's surface.

After dark, a computer-controlled telescope will tour the sky and display a deep-sky sampler of celestial objects including colorful nebulae, dazzling globular clusters, and multi-shaped far-away galaxies.

## Safety & First Aid

For emergencies, dial 911. First Aid will be available at the CERT Station and the StarFest Registration/Command Post, near the entrance. Please report all accidents to a StarFest volunteer immediately. Please notify CERT of any potential safety risks.

## Event Schedule – Friday August 11

11:00 a.m. Menghini Winery tasting room opens  
12:00 p.m. Open for Camper and RV check in  
1:00 p.m. Daytime solar observing  
Dusk - Dawn: Sky Telescope Viewing

## Event Schedule – Saturday August 12

8:00 a.m. – Open for Camper and RV check in  
9:30 a.m. - Departure to Mt Laguna Observatory  
10:00 a.m. – Merchant Booths Open  
10:00 a.m. – Kids Crafts in picnic area  
10:30 a.m. – Mt. Laguna tour starts for preregistered guests  
11:00 a.m. – Menghini Winery tasting room opens  
2:00 p.m. - Woody Scholm Solar Viewing  
2:00 p.m. – Kids Crafts in picnic area  
3:00 p.m. – Swap meet at the exhibit area  
5:00 p.m. - Alicia Sacks – Recycling  
6:00 p.m. - Raffle & award to Menghini Winery  
Tickets available at registration – 1 for \$5, 5 for \$20  
7:00 p.m. – Setup for public star party  
Dust – 11 p.m. – Public star party  
7:00 p.m. - Dr. Douglas Leonard speaking on “...Just when will Betelgeuse Explode?”  
8:00 p.m. - Doug Sollosy–The importance of Dark Skies  
9:00 p.m. - Woody Scholm Deep Sky Objects  
9:45 p.m. - Dennis Ammann Constellation laser show

## Event Schedule – Sunday August 13

10:00 am - StarFest Closes  
Please clean up your area

## Featured Speaker

**Dr. Douglas Leonard Ph.D.**

Associate Professor of Astronomy SDSU  
**"So...Just When Will Betelgeuse Explode?"**

Douglas Leonard is Associate Professor of Astronomy at San Diego State University. Dr. Leonard received his B.A. in astronomy and astrophysics from the University of Pennsylvania, and his M.S. and Ph.D. in astrophysics from the University of California, Berkeley. His publications include over 100 articles in the technical literature. A passionate science educator, his endeavors include work on several BBC/Horizon and Science Channel videos on black holes, cosmology, and the deaths of stars.

**Thank you for making the 2023  
Julian StarFest a success.**

**See you next year!**
